

Block Support Device

Will adjust to fit wood or concrete/steel poles.

Capable of “floating outward” should the load and force during stringing dictate more angle.

Arm and rollers can be rotated to facilitate stringing in either direction. Fits sizes 12” through 16” 74 series and sizes 20” through 35” 78 series S+R single conductor stringing blocks.

R-6201 Running Ground

Designed for EHV.

R-6201-A equipped with heat treated aluminum alloy rollers.

R-6201-D equipped with galvanized ductile iron rollers.

Both models accommodate wire sizes from 3/8” to 2” outside diameter.

Conductor Hook

Neoprene-covered hook.

Large diameter hole at top.

Hooks with spreaders for bundle conductors also available. Two models available to cover full range of conductors and load requirements.
