

Horizontal Line Post Adapter

HORIZONTAL LINE POST ADAPTER FOR USE WITH S&R XS-100-B UNIVERSAL STRINGING BLOCK

The LPA-17-A adapter is used with horizontal line posts. This adapter fits in the insulator cap and is held securely in place with the bolt, which is provided for securing the conductor clamp. Conductor is strung directly above the point where it will be tied. This enables accurate sagging and minimizes handling and lifting of conductor during clipping-in operation.

LPA-17-A ADAPTER

LPA-17-A Adapter permits placing block at 30° for negotiating angles.

LPA-17-A also designed for vertical line posts.
